MILLINGTON ASBESTOS DUMP

FEBRUARY 23, 1983

Mr. Bill Fries, Liberty Mutual Insurance, telephoned Dennis Faherty, NJDEP-DWM. Mr. Fries requested information pertaining to the Millington Asbestos Dump. According to Mr. Fries, his company represents the T.I.F.A. Company. The T.I.F.A. Company is in litigation with the National Gypsum Company over future stabilization work for the asbestos hill along the Passaic River. The T.I.F.A. Company wants to do additional stabilization work as areas of the slope show excessive erosion, but the National Gypsum Company (the former property owner) does not want this additional work. It is unknown why the National Gypsum Company is against this additional work.

Mr. Fries also has requested any other pertinent information; such as, Superfund status.

The purpose of this memo is to inform you of this request and to await instructions on a reply. The HSMA files have the Bureau of Flood Plain Management's approved plan for the original stabilization work and an affidavit from a former National Gypsum employee stating that the asbestos dump was placed along the Passaic River prior to National Gypsum acquiring the property.

I informed Mr. Fries that our Bureau was in the process of moving.

Please advise me on whether this information should be forwarded to the Liberty Mutual Insurance Company.
